1NTERFERON-ALPHA/BETA RECEPTOR ALPHA CHAIN PRECURSOR (IFN-ALPHA-REC)
                                                                                                                                                                                                                                                                                                                     SUBURITS THEMSELVES.

SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN.

TISSUE SPECIFICITY: IFN RECEPTORS ARE PRESENT IN ALL TISSUES
EVEN ON THE SURFACE OF MOST IFN-RESISTANT CELLS.

FIM: PHOSPHORYLATED ON TYROSINE RESIDUES BY TYRO TYROSINE KIN
SIMILARITY: CONTAINS 2 FIBRONECTIN TYPE III-LIKE DOMAINS.

SIMILARITY: BELONES TO THE CLASS II CYTOKINE FAMILY OF RECEPT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Cell. Biol. 14:8133-8142(1994).
FUNCTION: RECEPTOR FOR INTERFERONS ALPHA AND BETA. BINDING TO TYPE I TENS TRIGGERS TYROSINE PHOSPHORYLATION OF A NUMBER OF PROTEINS INCLUDING JAKS. TYRZ, STAT PROTEINS AND IFN-R ALPHA-AND BETA-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           functional human interferon alpha receptor ng and expression of its cDNA.";
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Handa R., Smalley D
